

**Applicant: Mario Meggiolan**  
**Application No.: 10/073,411**

Claims 1-33 and 45-50 are drawn to a method for making a wheel using a mold. Claims 34-37 claim an apparatus for molding a wheel. Claims 38-44 and 51-53 are drawn to a wheel rim of the type which may be fabricated by one or more of the steps described in claims 1-33, 45 or 46 and/or using the apparatus of claims 34-37.

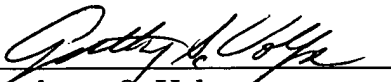

A restriction requirement based on distinction is proper if the inventions are distinct and a serious burden on the Examiner exists in examining the application. Applicant respectfully submits that no serious burden exists in examining all of the claims in the application. The inventions of claim groups I, II, and III, as separated by the Examiner, are so inter-related as to require a same field of search. Consequently, no serious burden exists. As such, examination of all of the pending claims together would be more efficient than separating the claims for examination in different applications.

**Applicant: Mario Meggiolan**  
**Application No.: 10/073,411**

In view of the foregoing, Applicant respectfully requests withdrawal of the restriction requirement and examination of all of the pending claims. If for any reason the Examiner believes that an interview, either telephonically or in person, would advance prosecution of the application, the Examiner is respectfully requested to contact the undersigned to arrange an interview.

Respectfully submitted,

Mario Meggiolan
